

KESTO- Design julkisivuprofiilit

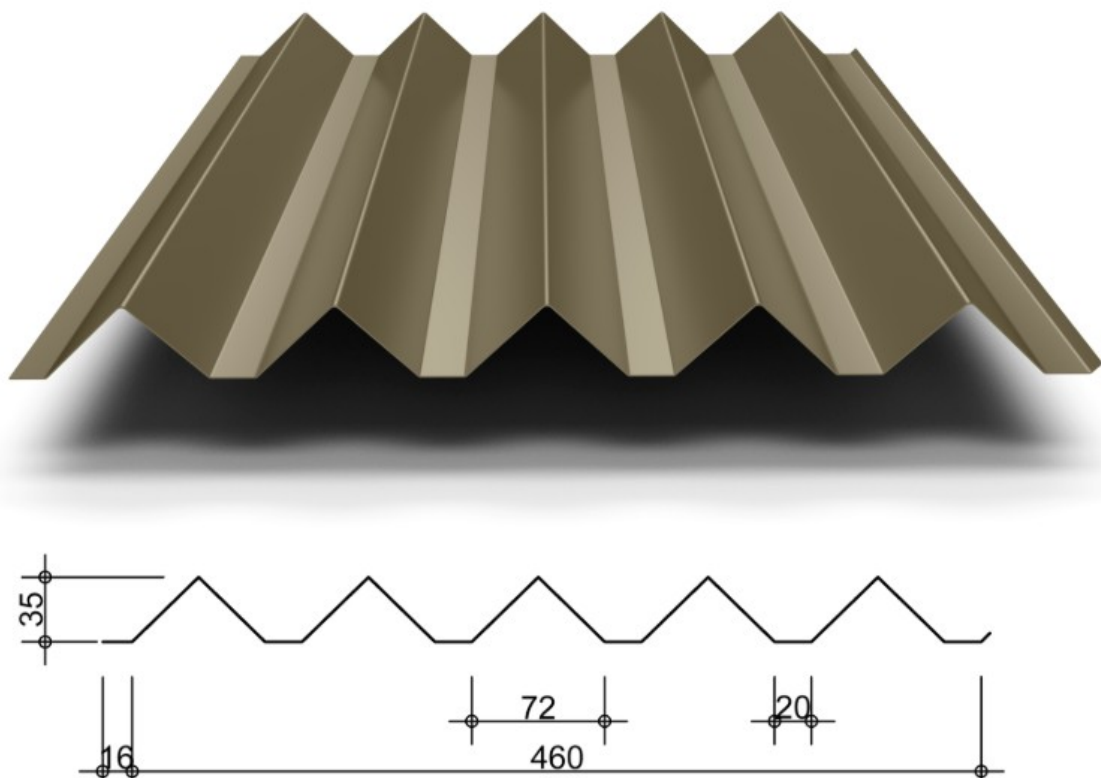

Design profiilit ovat esteettisesti näyttäviä julkisivuprofiileja. Niiden muodot ovat hillittyjä, mutta niillä saadaan korostettua julkisivun pintaa. Design profileista löytyy V-kärki profileja, sekä kulmikkaita BOX-profileja. Molempia voidaan tehdä myös suunnittelijan omilla mitoilla.

Profilien max pituus on 8200 mm.

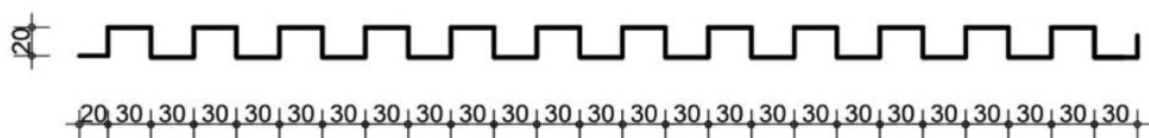

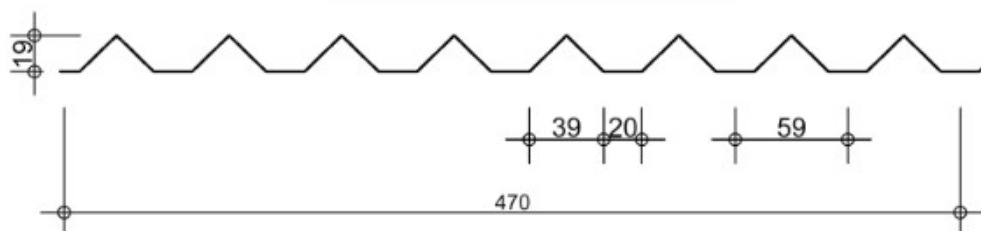

KESTO-Design V15/45

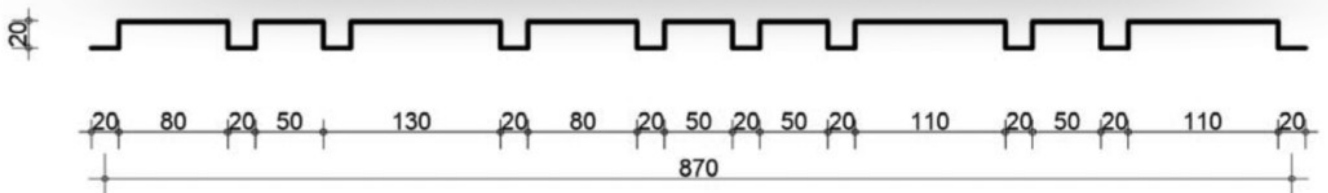

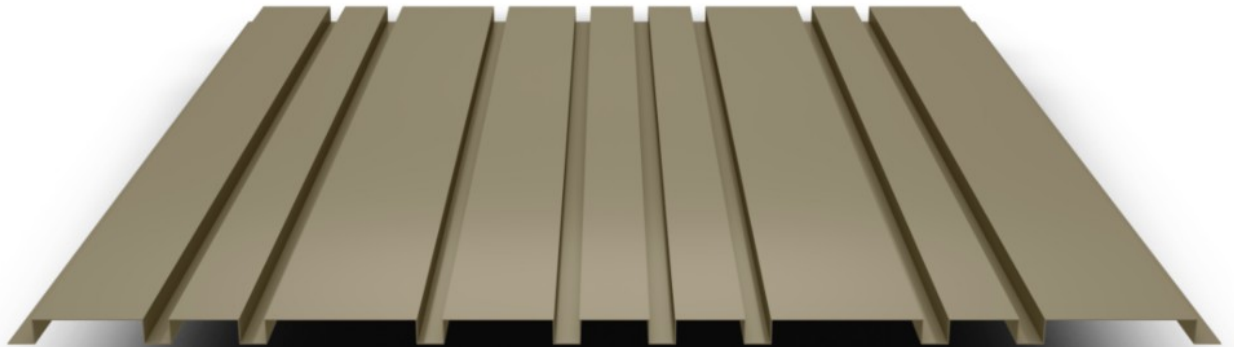

KESTO-Design V35

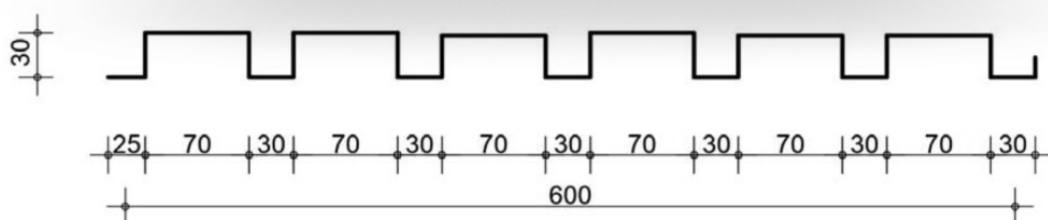

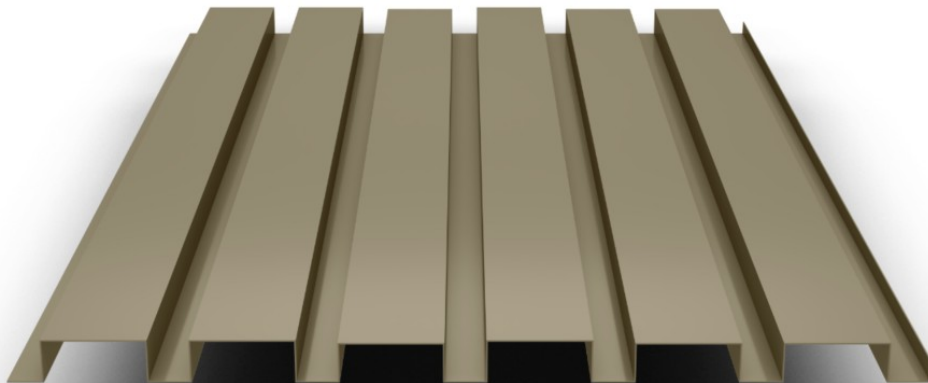

A 3D perspective view of a section of a corrugated metal roof. The structure consists of a series of repeating, symmetrical ridges and valleys, creating a wavy, undulating surface. The material is a metallic, olive-brown color. The lighting is soft and even, highlighting the geometric form of the ridges. The roof is shown from a slightly elevated angle, looking down its length. A soft, dark shadow is cast beneath the roofline onto the white background.

Kesto-Design julkisivuprofiili voidaan myös tehdä suunnittelijan omilla mitoilla. Mallintaminen on nopeaa ja koeprofiilin valmistus helppoa.

Kaikki Kesto-Design julkisivut tehdään pääsääntöisesti 0,6mm vahvasta pinnoitetusta sinkitystä teräksestä ja on saatavana myös rei'itettynä.
